WHAT'S YOUR BETTERWORLD ISSUE?

WATER

"So many people that I've seen
can't get clean water. It's a crime."
-- Jay-Z

Water is one of the most basic of all needs -- we cannot live for more than a few days without it. And yet, most people take water for granted. We waste water needlessly and don't realize that clean water is a very limited resource.

More than 1 billion people around the world have no access to safe, clean drinking water, and over 2.5 billion do not have adequate sanitation service. Over 2 million people die each year because of unsafe water - and most of them are children!

World Water Day, observed on March 22, is an important opportunity to educate ourselves and our communities about this most vital of all resources, explore ways to conserve it and protect the waters of our rivers, lakes, oceans and streams. It's a chance to address the issue of helping those without access to clean drinking water. World Water Day is also a time for ethical and moral discussion about water rights, particularly the growing trend of corporations taking over community access to water.

On March 22, 2005, the United Nations launched the **UN International Decade for Action on Water**, to help bring greater awareness to the global community about the growing problem of access to clean water for everyone.

*"We must treat water as if it were the most precious thing in the world, the most valuable natural resource.
Be economical with water! Don't waste it!
We still have time to do something about this problem before it is too late."
-- Mikhail Gorbachev*

"Inanimate objects are sometimes parties to litigation...So it should be as respects valleys, ridges, groves of trees, swampland, or even air that feels the destructive pressures of modern technology and modern life. The river, for example, is the living symbol of all the life it sustains or nourishes – fish, aquatic insects, water ouzels, otter, fisher, deer, elk, bear, and all other animals, including man, who are dependent on it or who enjoy it for its sight, its sound, or its life. The river as plaintiff speaks for the ecological unit of life that is part of it." -- Justice William O. Douglas
